WHY

Delhi Public School...

Delhi Public School are managed by Delhi Public School Society. Delhi Public Schools are one of the largest chain in public school in India and abroad with our 150 members. Over a period of sixty year. DPS has gathered experience and knowledge in managing K-12 education as few have and this depth finds reflection in the way education is imparted in our school. DPS believes in not just educating but in nurturing each student as the leader for tomorrow-a fact borne out by the eminence of the alumni of this chain all over the globe.

What we offer...

DPS Shikohabad promises to deliver world class holistic education to its students. Education that imparts knowledge by instilling confidence. Students are encouraged to ask question instead of merely answering them because we believe that a curious mind is the receptacle of learning. We allow young children to explore because we believe that learning can not be confined within the four walls of the classroom and that there is no better teacher than nature. We have embraced technology and innovation with an open mind because children of this millennium have to master technology and not become its slave.

Our efforts are backed by the ergonomic and scientifically designed campuses which are learning space as whole. Emphasis has been laid on utilizing natural resources to the fullest. Students are taught the importance of environmental conservation through conscious minimizing and recycling of waste making the school a zero-tolerant zone for plastic poly-bags.

Evaluation - No room complacency.....

Evaluation for us is sacrosanct and not merely a tool to judge the capacity of a child to memorize printed world. Evaluation is done via aptitude and skill based tests. These are used to understand every individual's learning curve, capabilities and optimize each student's study program. Evaluation also includes areas such as essential life skills, conceptual development, personal attributes, social, emotional and behavioral development, work habits, etc.

Curriculum the backbone of education

The Curriculum at our school assimilates the best form various sources and inspirations. A great emphasis is laid on thematic studies. Thematic learning, as a concept, can be best explained as the linkage and delivery of various subjects in a manner that demonstrates the practical application of learning as opposed to rote learning. Thematic instruction is based on the idea that children acquire knowledge best when learning is the context of a coherent 'whole' it seeks to put the learning of cognitive skills such as reading, mathematics, science and writing in the context of a real world subject that is specific enough to be practical and broad enough to allow creative exploration. This philosophy guides that institution's homework and assignment content which are minimal enough so as not to burden that child and though provoking enough to encourage them to embark on a journey of self discovery.
